# How to?

(Assembly instructions)

- I. **Stitch b. on a.**  
Make sure to align all stitching holes.  
tips: if you are sure of perfect superposition,  
you can lightly glue pieces to keep  
them in place
- II. **Stitch c. on d.**
- III. **Join a. and d. (fig.I), start stitching from the  
middle (junction point) to left end.**
- IV. **Start again from the middle to the right end.**  
Result must be something like fig.II (view from the top)
- V. **Congrats! Here's your new basket (fig.III)**  
Enjoy and have fun!
